Car
60 million cars are produced every year. That's 165,000 a day, 6,875 an hour, and 115 a minute. 1 billion cars are currently in use around the world. That's around one car for every seven people on Earth. The average car contains over 30,000 unique parts. When you think about it, it's a miracle they don't break down more often.
